Utilizzando Cocoon Silk rispetto ad una carta non riciclata, l'impatto ambientale sarà ridotto di:

65 kg di rifiuti

8 kg $CO^2$

88 km percorsi mediamente da una macchina europea

2573 litri d'acqua

151 kWh di energia

107 kg di legno

**Fonte: www.arjowigginsgraphic.com**
La valutazione dell'impronta carbonio è realizzata da Labelia Conseil conformemente al metodologia Bilan Carbone®. I calcoli vengono da un paragone tra la carta riciclata considerata ed una carta a fibre vergini secondo gli ultimi dati disponibili dell'European Bref (per la carta a fibre vergini). I risultati ottenuti sono generati da informazioni tecniche e sono soggetti a modifica.
